

The Investor WatchList comprises companies that Audit Integrity views as having the greatest short-term equity risk. Selection criteria includes: our lowest **Accounting and Governance Risk (AGR) Rating of Very Aggressive, Equity Model Ranking of 1**, and market data such as relative price performance, short interest and average daily volume. Deletion criteria includes: an Equity Model Ranking of higher than 1, or a price below \$3.00.

The combined utilization of AGR risk with key market indicators results in an effective and predictive Investor WatchList that provides the investor community with actionable information. The Investor WatchList companies, in our judgment, have not been recognized by the larger marketplace as having high potential for deterioration in price. A significant differential, in contrast with the Total Stock Market, is evidenced by the year to date and trailing twelve month results shown below.
